

*Fisher&Paykel*

## A HISTORY OF INNOVATION

Since our founding in 1934, we have grown into a global, design-led company of more than 3,000 people. Designed and engineered in New Zealand, our products are sold in 50 countries around the world. Our design heritage is founded on a pioneering spirit and a culture of curiosity that has challenged conventional appliance design to consistently deliver products tailored to human needs. For us, legacy is about looking into the future, while ensuring what we develop today is aligned to the fundamental principles of sustainable design. We are committed to ongoing research and development. Our culture is one of open innovation, which allows people to work collaboratively to find insights and ideas that connect with our customers and respect our planet.

We live one day at a time.

Cooking  
eating  
cleaning  
washing  
drying  
hunting  
gathering  
talking  
playing  
relaxing.

And then doing it all over again.

Day in, day out.

**TURNING ROUTINES INTO  
EXPERIENCES**

Behind every product is a story and that story starts with you. Your home is an expression of who you are and how you live. Our passion is creating better products that turn everyday routines into enjoyable experiences. We understand the dynamic nature of modern living. We deliver products that are adaptable, functional and durable, as well as human. We don't just make things that fit the space provided, we create products that fit the lives lived around them. Live life — we'll take care of the details.

## THE SOCIAL KITCHEN

The kitchen is the humble engine room in which we choose to live — where we create, socialise and enjoy the best that life has to offer. Cooking is a social activity. We generally place the key appliances in what we consider to be logical places: the work triangle of cooktop, sink and fridge. But we no longer cook in straight lines. We don't cook on conveyor belts. Sometimes we assemble, sometimes we bake, sometimes we stir-fry and sometimes we boil. We don't cook the same way every day: we can be a weekday cook and a weekend gourmet. The work triangle limits our creativity. It's not just about efficiency; sometimes it's about fun. Too many cooks may spoil the broth or they may create a wonderful, social and enjoyable meal. Let's reclaim the kitchen. Let's live outside the triangle.

#### DESIGNED FOR REAL LIFE

At Fisher & Paykel, we are curious about people—how they live, where they live, what they do and how they use things. This is where hidden insights wait to be uncovered. We are curious about not only the function and performance of our products, but also the emotional role they play in people's lives. For us, design is not a self-serving goal—it is a human endeavour to make life a little bit better.

COOK

## COOK TO CREATE

We see cooking not as a chore, but a creative act. As more of our lives become virtual and people look for ways to make and create things, we design high-performance tools you can rely on and be creative with, that turn everyday meals into creations. Fisher & Paykel products cater for different patterns of use—whether it's mid week convenience or weekend gourmet, heat and eat or a family feast. We understand everyday life and support the lives lived around our products. Cooking is part of our DNA—one part designer, one part chef. We have a passion for food and we are just as interested in making high-performance ovens that perfect your favourite foods as making the process of cooking more enjoyable. Our insights come from real-world use and then the results are tested in our lab daily, with the aim of inventing technologies that deliver the perfect cooking result.

### BUILT-IN OVENS

Fisher & Paykel's multifunction Built-in Ovens are designed to perfect your favourite food, with a full range of cooking modes and temperatures providing greater control and more flexibility; and with a selection of generous oven sizes to meet the needs of the most demanding cook. Roasting is an art as well as a science. The difference between rare and medium takes timing, intuition and a well-trained eye. Fisher & Paykel's Built-in Ovens are programmed to quickly heat to a high temperature, browning the meat to create delicious savoury flavours before automatically lowering the temperature to deliver a perfect, tender roast every time. Most of our ovens are pyrolytic self-cleaning and include cool-touch doors with multiple panes of glass and advanced cooling systems that ensure the external surfaces remain safe to the touch.

---

### 90cm Built-in Oven

---

A generous capacity and intuitive control system allows for precise cooking-mode selection every time. It's ideally suited to under-bench positioning and will align perfectly with other Fisher & Paykel 90cm Built-in appliances. This oven also features a pyrolytic self-cleaning function.

---

#### 1 Perfect Results

Create delicious savoury flavours, with the powerful 4050W professional quality rotisserie grill.

---

#### 2 Sized to Suit

With a spacious 103L total and 87L useable capacity, this wide oven is designed to accommodate both side-by-side and double-layered cooking.

---

#### 3 Designed to Match

Finished in black reflective glass and stainless steel, this elegant, yet durable design, sits beautifully within the Fisher & Paykel coordinated kitchen family.

---

#### 4 Easy Cleaning

No need for harsh chemical cleaners in our pyrolytic self-cleaning ovens; simply remove the racks and set to self-clean. Smoke and odours are minimised through a catalytic smoke eliminator.

---

#### 5 Precise Control

Oven functions are pre-set at the touch of a dial, while brilliant lighting, combined with a large viewing window reduce the need to open the oven door, improving energy efficiency and cooking results.

---

#### 6 Safe and Sound

Cool-touch doors save energy while keeping the kitchen cooler and safer for little hands. Telescopic slides make it easier and safer to remove hot dishes.

---

#### 7 Accessories

This oven comes with an easy-to-assemble rotisserie kit; a two-piece anti-splatter grill system and an aluminium baking tray.

---

### 60CM BUILT-IN OVEN

Welcome to the next generation in Fisher & Paykel Built-in Ovens. Designed specifically for diverse cooking styles, with generous capacity, high performance and a full range of oven functions including the new vent bake—which offers the ability to control the removal of moisture from the baking or roasting environment for optimum cooking results. An oven's performance can't be measured by a single stand-alone feature and our Built-in Ovens offer a full package of features and functions to deliver optimum results for both cooking and cleaning up afterwards. Built for cooking performance, an intuitive control system allows for precise cooking-mode selection every time. These ovens have generous internal capacity, fitting 30 percent more than traditional European ovens and they clean up after themselves with a pyrolytic self-cleaning function. The sleek lines and design detail mean they are ideally suited to fit with the rest of Fisher & Paykel's coordinated kitchen family, from Cooktops to ActiveSmart™ Fridges, DishDrawer™ Dishwashers and CoolDrawers™.

## 60cm Built-in Oven Range Features

### 1 ActiveVent™ System

Food is perfectly cooked with the lowest possible amount of energy using the ActiveVent™ system, unique to the 60cm Built-in Oven range. The active venting system and up to 11 cooking functions optimise the balance between excellent cooking performance, condensation management and energy consumption. Full temperature is reached quickly with a rapid heat-up feature and a powerful grill (up to 3200W) that gives you an even and quick result, perfect for browning and caramelising.

### 2 Large Oven

Sized to fit the food you cook, Fisher & Paykel have the largest 60cm Built-in Oven on the market, providing 90L total and 77L of usable capacity. The maximised height means you're able to fit a large casserole dish, the family roast and even a pie as well—true multi-shelf cooking. Two shelves can be fully utilised at the same time without hot spots or uneven browning. A 5.5kg turkey (or other cut of meat) can be deliciously cooked using the optional rotisserie kit (OB60SL11 & OB60SL9 models).

### 3 Elegant Design

All of the three models in our Built-in Oven range are finished in black reflective glass and stainless steel that blends elegant, minimalist aesthetic with design for durability. The finishes and handles match the rest of Fisher & Paykel's coordinated kitchen family, from Cooktops to ActiveSmart™ Fridges, CoolDrawers™ and DishDrawer™ Dishwashers.

### 4 Pyrolytic Self-Cleaning

No need for harsh chemical cleaners in our pyrolytic self-cleaning ovens as food residues inside the oven walls are naturally broken down at a very high temperature, leaving only a light ash that can be removed with a damp cloth. The non-pyrolytic OB60SL9 model has catalytic liners that break down oil and fat splashes during normal cooking. A unique clipping system for side racks and a simple glass mounting system for the oven door mean quick and easy removal and replacement when cleaning.

### 5 Pre-set Oven Functions

The range features three models with either 11, nine or seven cooking functions that include: Bake, Vent Bake, Fan Bake, Classic Bake, Pastry Bake, Fan Forced, Roast, Grill, Fan Grill, Rotisserie, Warm and Self-Clean. On the 11 and nine function models there is no need to program the functions, as these are pre-set at the touch of a dial to deliver just what you need to cook each dish to perfection.

### 6 Safety Features

The 60cm Built-in Oven features a beautifully balanced, lighter and less bulky cool-touch door for safety. An exceptional cooling system allows for a three-pane glass door rather than heavier four panes, while still achieving cool-touch status to ensure it's safe to touch externally. Sliding hot oven dishes all the way out of the oven is made safe with full extension shelves. These are designed to integrate with the shelf for quick and easy removal and adjustment.

### 7 Accessories

The rotisserie kit option has a 5.5kg capacity and ensures delicious roasts are browned evenly as the surface is continuously basted. Prepare the meat on the spit and rotisserie dish, then simply slide it into the oven. To achieve the perfect internal temperature, the meat probe will detect the temperature at the centre of the meat and show it on the control panel (OB60SL11 only). Crafted from heavy-gauge enamelled steel, the three-piece dish system includes a deep roasting dish, splatter tray and grill rack.

## 60cm Built-in Oven

Built for performance, an intuitive control system allows for precise cooking-mode selection. Generous internal capacity fits 30 percent more than traditional European ovens and offers a pyrolytic self-cleaning function\*. The sleek lines and design detail match the rest of the Fisher & Paykel built-in appliance range.

### 1 Perfect Results

Using the unique ActiveVent™ system and up to 11 cooking functions, you can optimise cooking performance, condensation management and energy consumption.

### 2 Sized to Suit

This is the largest 60cm Built-in Oven on the market, providing 90L total and 77L of usable capacity (OB60SL models only).

### 3 Designed to Match

Our Built-in Oven range is finished in black reflective glass and stainless steel, matching the rest of Fisher & Paykel's coordinated kitchen family.

### 4 Easy Cleaning

No need for harsh chemical cleaners in our pyrolytic self-cleaning ovens. The non-pyrolytic OB60SL9 model has catalytic liners that break down oil and fat splashes.

### 5 Precise Control

Oven functions are pre-set at the touch of a dial while brilliant lighting and a large viewing window reduce the need to open the oven door.

### 6 Safe and Sound

A clever cooling system allows for a lighter three-pane glass door, while still achieving cool-touch status.

### 7 Accessories

This oven comes with a heavy-gauge enamelled steel dish system with deep roasting dish, splatter tray and grill rack and the option of a rotisserie kit (OB60SL11 and OB60SL9 only) and meat probe (OB60SL11 only).

\* Pyrolytic function not available for OB60SL9 or OB60SL7 models

#### ACTIVE VENTING

An oven's performance can't be measured by temperature and heat alone — moisture is a vitally important but often neglected factor in the cooking performance of your oven. If your oven holds too much moisture or too little, your gastronomic creation can quickly turn to disaster. That's why the Fisher & Paykel nine and 11 function Built-in Ovens feature the unique ActiveVent™ system as well as a full package of features and functions (OB60SL11 only). Fisher & Paykel's ActiveVent™ system allows you to control the removal or retention of moisture from the baking or roasting environment to get the very best cooking results and energy consumption.

### KITCHEN COMPANION PRODUCTS

Whether it's a fresh coffee in the morning, a healthy steamed lunch or a quick ready-made meal in the evening, the Kitchen Companion Product Range takes convenience to a new level. The range includes a Coffee Maker, Steam Oven, Compact Oven, Combination Microwave Oven and Warming Drawer, offering a complete modular family designed to complement any kitchen. Temperature pre-selection and an oven programmer mean that cooking times can be pre-set across the product family, so multiple dishes can be easily coordinated. Each product is based on standard dimensions and can be easily configured to suit your preference — whether it's stacked vertically, placed side-by-side in a linear fashion or configured in a two-by-two block. Any combination will deliver a unified built-in solution. Design features include capacitive touch controls and standard fascia height with black reflective glass and polished metal trim matching the broader Fisher & Paykel range including Cooktops to ActiveSmart™ Fridges, CoolDrawers™ and DishDrawer™ Dishwashers to create an integrated look throughout your kitchen.

#### DESIGN FLEXIBILITY

Perfect modularity means Fisher & Paykel's kitchen companion products can be positioned for maximum functionality—whether this is in a compact block, a vertical stack or side-by-side in a linear set. Beautifully finessed design features matched with the optional trim kit allow the kitchen companion range to fit the popular 48cm kitchen module height.

---

## Compact Oven

---

Space — sometimes there just isn't enough of it. Enter the Fisher & Paykel Compact Oven, the little oven that thinks big, with design detail ideally suited to fit with other Fisher & Paykel's built-in appliances, both large and small.

---

### 1 Perfect Results

The Compact Oven delivers the superior performance and full functionality of a large model with a choice of eight multi-function programs, temperature pre-selection and an oven programmer.

---

### 2 Sized to Suit

A compact 460mm height means this oven can be placed virtually anywhere. All companion products can be installed at a convenient height to suit your kitchen design and preference.

---

### 3 Designed to Match

Finished in black reflective glass and polished metal, these elegant, yet durable compact ovens match the other companion products and the larger coordinated kitchen family.

---

### 4 Easy Cleaning

The Compact Oven has an easy-clean enamel interior with a catalysing filter that removes odours while you cook. The oven door has removable glass panes for effortless cleaning.

---

### 5 Precise Control

All the information you need at a glance is on the intuitive display, including a recipe menu and digital temperature control for absolute accuracy. Capacitive touch controls and an electronic touch panel make this oven very easy to use.

---

### 6 Safe and Sound

The compact oven has a well-balanced, three-pane glass, cool-touch oven door along with a childproof key lock for extra safety. Cool-touch doors save energy, keep the kitchen cooler and make the kitchen safer for little hands.

---

Fisher & Paykel

---

## Steam Oven

---

This Steam Oven provides appetising and healthier alternatives to fried and baked food. Steam cooking is one of the easiest yet oldest forms of cooking and can be used for almost any food. Heat from steam diffuses through food allowing it to cook in its own juices, retaining valuable nutrients, minerals and vitamins and—most importantly—flavour. The Steam Oven adds a new dimension to oven-based cooking.

---

### 1 Perfect Results

---

The Fisher & Paykel Steam Oven allows for healthy and easy cooking—keeping food moist and fresh with no oil, smoke or mess. The oven heats up quickly and cooks most meals in 30 minutes or less.

---

### 2 Sized to Suit

---

At 460mm high, this 29L built-in Steam Oven can be placed virtually anywhere, fitting perfectly with other products in the kitchen companion range. An optional 21mm trim kit ensures a perfect match with the full range of 60cm built-in kitchen products.

---

### 3 Designed to Match

---

All of our kitchen companion products are finished in black reflective glass with polished metal trim that blends elegance with durability.

---

### 4 Easy Cleaning

---

Cleaning and care of the Steam Oven is simple. After each use, simply clean the smooth stainless steel interior with a dry cloth after the steam generator has cooled.

---

### 5 Precise Control

---

The oven beeps when the food is ready and the intuitive display provides all the information you need, including cooking function selection, time and when to refill. A removable one litre water reservoir is used to generate steam that lasts almost an hour. An alarm sounds when it's empty and it's simple to refill.

---

### 6 Safe and Sound

---

The Steam Oven comes with a childproof key lock for extra safety.

---

---

## Combination Microwave Oven

---

Fast cooking is the primary advantage of the built-in Combination Microwave Oven. This oven merges the traditional crisping and browning benefits of the convection oven with the speed of a microwave, and 10 different cooking modes including Reheat, Defrost, Bake and Grill.

---

### 1 Perfect Results

Forget soggy defrosted foods or uneven heating. This oven incorporates the best of convection and microwave technology and eliminates the need for two separate appliances, with a choice of 10 cooking modes combined with a powerful 1000W microwave offering 19 power levels.

---

### 2 Sized to Suit

A compact 460mm height means this Combination Microwave Oven can be placed virtually anywhere at a height to suit you. An optional 21mm trim kit ensures a perfect match with the full range of 60cm built-in kitchen products.

---

### 3 Designed to Match

All of our kitchen companion products are finished in black reflective glass and polished metal that blend an elegant, minimalist aesthetic with design for durability.

---

### 4 Easy Cleaning

The smooth enamel interior with glass inner door, drop-down grill and removable side racks, along with a turntable, make cleaning easy.

---

### 5 Precise Control

All the information you need at a glance is shown on the intuitive display, including a cooking guide with 12 pre-selected automatic cooking modes.

---

### 6 Safe and Sound

The Combination Microwave Oven has a childproof key lock for extra safety.

---

Fisher & Paykel

Fisher & Paykel

---

## Coffee Maker

---

Like having a barista in your kitchen, the built-in Coffee Maker is designed to make coffee just the way you like it. Offering adjustable coffee strength and temperature, multiple coffee cup sizes and 15-bar pressure at the touch of a button, it's the perfect way to start each day.

---

### 1 Perfect Results

---

Easily adjusted to suit your preference, this Coffee Maker also provides automatic descaling and cleaning for perfect coffee, every time.

---

### 2 Sized to Suit

---

The adjustable coffee dispenser holds 250g of coffee and the centrally positioned steam milk frother avoids unnecessary detachable milk containers.

---

### 3 Designed to Match

---

Finished in black reflective glass and polished metal, the Coffee Maker matches the other Fisher & Paykel coordinated kitchen family.

---

### 4 Easy Cleaning

---

The Coffee Maker has a self-cleaning function and comes with a removable drip tray and a bin for used coffee grounds.

---

### 5 Precise Control

---

The intuitive electronic touch panel display includes refill, cleaning and maintenance data, plus a program to memorise your favourite coffee recipe. Twin LED lights ensure you see what you are doing on those dark mornings.

---

### 6 Safe and Sound

---

The unit glides out on telescopic slides to easily add coffee beans and the adjustable shut-off timer switches the machine off after a set period or when you have made your last coffee. The on/off switch is conveniently hidden for children's safety.

---

### 7 Accessories

---

These comprise: coffee dispenser spoon; descaling solution; and optional lower trim kit.

---

---

## Warming Drawer

---

Putting the finishing touch to a delicious meal or coffee, the Warming Drawer keeps plates and cups warm. It's designed to fit under 48cm or 60cm high appliances and can be installed in many combinations—under the bench or built into the wall. It's also strong enough to support the weight of other products such as an oven or coffee maker.

---

### 1 Perfect Results

---

A separate Warming Drawer allows you to warm plates while you finish cooking. The temperature control settings (45°, 55° and 65°C) and even heat distribution within the Warming Drawer means no hot spots. Two timer settings can maintain a temperature for a set time or it can be left on for up to 12 hours.

---

### 2 Sized to Suit

---

Designed to fit under 48cm and 60cm ovens and other kitchen appliances, the Warming Drawer can be installed with or without other appliances under-bench or built into the wall at a convenient height.

---

### 3 Designed to Match

---

Finished in black reflective glass or stainless steel, the Warming Drawer matches the other Fisher & Paykel kitchen companion products and the larger coordinated kitchen family.

---

### 4 Easy Cleaning

---

The front panel and smooth-glass base of the Warming Drawer are easy to wipe clean.

---

### 5 Precise Control

---

All the information you need at a glance is shown on the illuminated touch display, including temperature settings and shut-off timer.

---

### 6 Safe and Sound

---

Full extension slides make it safe to remove hot crockery with minimal obstructions and, as an extra safety measure, the drawer turns itself off after 12 hours of continuous use.

---

## COOKTOPS

So many things to consider when selecting a cooktop: a look to match your kitchen, a size to fit your space and a fuel type to suit your cooking style. It all comes down to personality and preference. Whether it's the performance and theatre of live flame, the precision, control and sleek simplicity of induction, or the straightforward power of an electric cooktop, Fisher & Paykel's Cooktop family is designed to provide a full range of solutions. Whatever your choice, there are many configurations and sizes to suit any cooking style. Each product has been designed to deliver great performance—from searing heat to the gentlest of simmers—and all are designed for easy cleaning and with safety in mind.

---

## Gas on Glass Cooktops

---

The Gas on Glass range combines the cleanability of the highest-quality glass surface with the efficiency of gas cooking. It delivers total cooking precision through the latest burner technology and elegant stainless steel controls. The Gas on Glass series is a modular family of appliances designed using premium quality materials with a polished metal trim.

---

### 1 Perfect Results

Our award-winning Gas on Glass Cooktops come equipped with powerful burners; the wok burner has a uniform flame for even heat distribution while the auxiliary burner has the added capability of exceptionally low temperatures (0.7MJ/h)—ideal for delicate sauces.

---

### 2 Sized to Suit

A range of different sized elements can be used together: 90cm three-burner and 75cm two-burner. The wok burner comfortably takes a large wok and is among the most powerful on the market at 18MJ/h.

---

### 3 Designed to Match

The black reflective glass, brushed stainless steel and polished metal trim blend elegance with durability to match the rest of our coordinated kitchen family.

---

### 4 Easy Cleaning

The easy-to-clean cooktop design means you can simply remove the trivets, wipe and walk away.

---

### 5 Precise Control

It delivers total cooking precision through the latest burner technology and elegant stainless steel controls.

---

### 6 Safe and Sound

The flame failure safety device means that if the flame is accidentally extinguished the gas automatically turns off. We only use ecofriendly ceramic glass without any arsenic or heavy metals used in the manufacturing process.

---

Red Dot Award 2013—Product Design

---

## Gas on Steel Cooktops

---

The Gas on Steel cooktops come in different sizes and offer power levels for everything from a slow simmer for sauces, to an intense heat for steaks and stir-fries. Combining the attractiveness of sleek stainless steel with the durability of cast iron trivets, these cooktop supports the most avid chef.

---

### 1 Perfect Results

---

The Gas on Steel Cooktop perfects the slow simmer for sauces to the intense heat needed for steaks and stir-fries, with five different strength burners including some of the most powerful available.

---

### 2 Sized to Suit

---

With up to five burners, including simmer, rapid and two wok burners provide great cooking flexibility.

---

### 3 Designed to Match

---

The brushed stainless steel blends elegance with durability — matching the rest of our coordinated kitchen family.

---

### 4 Easy Cleaning

---

These cooktops are designed as a singular piece of steel with quick component removal for easy cleaning. Durable and easy to clean, cast iron box trivets provide a safe and stable cooking surface. The rubber feet ensure that the cooktop is not scratched when the trivets are placed onto the cooktop.

---

### 5 Precise Control

---

Innovalve™ technology allows you to adjust the flame with unprecedented 180 degree gas valve rotation (CG905DWACX1 only). Most cooktops offer only 70 degree rotation. For accurate temperature control, ergonomic dials on the side of the cooktop automatically ignite the flame quickly and safely.

---

### 6 Safe and Sound

---

Indicator lights show which burners are in use and alert you if the gas shuts down (CG905DWACX1 only). The flame failure safety device means that if the flame is accidentally extinguished the gas automatically turns off. All Fisher & Paykel Gas Cooktops feature electronic ignition ensuring they are quick, reliable and safe.

---

---

## Touch Control Induction Cooktops

---

Traditionally we cook by generating heat from one source, such as a flame, and conducting it to another. Fisher & Paykel Induction Cooktops work on a different principle. The cooktop itself produces electromagnetic vibrations, which induce the pot or pan to generate its own heat, resulting in shorter heat-up times and a safer cooking surface.

---

### 1 Perfect Results

---

The PowerBoost function delivers instant, intense heat when you need it and the GentleHeat function produces slow, continuous simmering.

---

### 2 Sized to Suit

---

Select from 90cm five zone; 75cm four zone; and 60cm four zone; to suit all sizes of cookware. The cooktops are perfectly flat so the surface can be used as an extension of your preparation area.

---

### 3 Designed to Match

---

Induction cooking is popular with those who love visual simplicity and clean, smooth lines. Finished in black glass, you get elegant design with durability.

---

### 4 Easy Cleaning

---

The flat surface is easy to clean because there are no obstructions and because Induction heats just the pot rather than the surrounding glass, the likelihood of burned spill overs is greatly reduced.

---

### 5 Precise Control

---

Induction cooking delivers an immediate response with greater energy efficiency than that of either gas or electric. Soft-touch controls are simple to use and provide great precision.

---

### 6 Safe and Sound

---

This cooktop will alert you if it's turned on without a pot or pan on it, and will switch off if you don't respond. It will switch off if the pan being used isn't suitable for induction cooking and a key lock is provided for extra safety. We use ecofriendly ceramic glass in the production of our Induction Cooktops without any arsenic or heavy metals used in the manufacturing process.

---

---

## Electric Cooktops

---

### 1 Perfect Results

Solid performers with superb simmer results, our Electric Cooktops allow you to move pots and pans around simply and quickly while high-speed ribbon elements provide good temperature control from a rapid boil to an extremely low simmer.

### 2 Sized to Suit

Four size variations and either two, four or five element configurations are available. Because our Electric Cooktops are perfectly flat and cool down quickly when switched off, the surface can be used as an extra preparation area.

### 3 Designed to Match

Designed using premium quality materials, the finishes and controls match the rest of our coordinated kitchen family.

### 4 Easy Cleaning

The flat surface makes our Electric Cooktops very easy to clean. Ceramic glass is very strong, adding to the durability and performance of the cooktop.

### 5 Precise Control

You have the choice of classic dial controls or the perfectly flat Touch&Slide functionality. The intelligent timer on touch-control models lets you activate any combination of elements, or you can simply use it as a minute minder.

### 6 Safe and Sound

Hot surface indicators glow until the surface is safe to touch and the Touch&Slide Electric Cooktop will turn off if something spills over the controls. We use eco-friendly ceramic glass in our Cooktops, without any arsenic or heavy metals used in the manufacturing process.

---

## FREESTANDING COOKERS

Fisher & Paykel's Freestanding Cookers are the showpiece of the kitchen and deliver outstanding performance. These are the domestic version of the professional chef's cooker. With a commanding presence they not only look like they've come from a restaurant kitchen but also deliver similarly high performance. There are up to eight cooking functions in the electronic oven ranging from Defrost to Fan Bake including Rotisserie in some models and a powerful grill element – perfect for any culinary requirements.

---

## 90cm Freestanding Cooker — Gas

---

This freestanding, professional-style cooker gives you the flexibility to prepare several courses simultaneously. With a large electric oven combined with a five-burner gas cooktop, the clean lines in black reflective glass and stainless steel complement the style and elegance of any kitchen.

---

### 1 Perfect Results

---

Eight oven functions from Fan Grill to traditional Bake and Rotisserie, plus a powerful 3600W grill, give you professional quality results.

---

### 2 Sized to Suit

---

Our Freestanding Cookers are spacious, with a 103L total and 87L usable capacity. A shelving system and concealed lower element allow ample space for larger meals.

---

### 3 Designed to Match

---

Designed using premium quality materials and built to last, the black reflective glass and stainless steel blend balanced aesthetic with design for durability.

---

### 4 Easy Cleaning

---

Concealed elements and a drop-down grill make cleaning quick and simple, while catalytic liners break down oil and fat splashes during normal cooking. The cooktop is made from a single piece of stainless steel that contains spills. The oven door and its inner pane of glass can be removed for easy cleaning and the storage compartment minimises clutter for all oven accessories.

---

### 5 Precise Control

---

Generous metal control dials with a simple, functional interface are positioned on a full stainless steel control panel for precise control over cooking temperatures.

---

### 6 Safe and Sound

---

A cool-touch door and built-in cooling system ensure the oven door is safe to touch externally. Streamlined trivets let you slide pots and pans without lifting them.

---

## RANGEHOODS

Kitchen inspiration doesn't exist in a vacuum, but simple and responsive extraction is as important as achieving the right look for your kitchen. Designed to complete your kitchen, you can select a Rangehood that sits above your cooktop or one that is hidden away until needed, depending on what best suits your kitchen layout and cooking style. No matter which you choose, all of Fisher & Paykel's ventilation products are built to perform. Whether it is a built-in Powerpack, or Canopy-style VentSurface™, each has been designed as the perfect partner to our Cooktops and each captures and eliminates cooking odours, vapour and steam effectively. They are easy to use and feature intuitive controls that respond to the touch of a finger.

---

## VentSurface™ Wall Rangehoods

---

VentSurface™ has been designed to provide a simple and efficient means of removing steam and cooking odours from the kitchen through automatic adjustment.

---

### 1 Effective and Quiet

---

The clever technology in this Rangehood senses cooking activity and turns on automatically and constantly adjusts to capture and eliminate rising cooking odours, vapour or steam. Perimeter extraction technology creates a high velocity vacuum that is more effective over a wider area than that of traditional Rangehoods and is far quieter than those using conventional technology.

---

### 2 Designed to Match

---

VentSurface™ comes in two sizes (120cm and 90cm) and is designed to fit any contemporary kitchen and match the Fisher & Paykel kitchen family. VentSurface™ Rangehoods are finished in black reflective glass and stainless steel that blend elegance with durability, while hiding unsightly filters.

---

### 3 Easy Cleaning

---

The black reflective glass and stainless steel finishes are easily wiped clean and the filters are dishwasher safe. A filter cleaning alert reminds you when to clean it and ensures you get the best performance out of the Rangehood.

---

### 4 Precise Control

---

A small selection of simple, soft-touch buttons give you control of the clever technology inside and once set to automatic, the VentSurface™ responds the moment you start cooking.

---

---

## Canopy Rangehood

---

Designed as the perfect partner to our Cooktops, Canopy Rangehoods are easy to use, easy to clean and feature intuitive controls.

---

### 1 Effective and Quiet

---

These Rangehoods offer a selection of fan speeds and clever features that quietly and efficiently remove steam and cooking odours from the kitchen. Odours can linger in the kitchen well after cooking is finished. The practical timer feature keeps the canopy working for up to 15 minutes before it automatically turns itself off.

---

### 2 Designed to Match

---

Fisher & Paykel's Canopy Rangehoods will fit any contemporary kitchen and perfectly match the Fisher & Paykel kitchen family with their black reflective glass and stainless steel.

---

### 3 Easy Cleaning

---

An interior, wipeable plate makes cleaning effortless. Multi-layered filters trap grease effectively. Designed for simple removal, the filters are easy to clean and dishwasher safe.

---

### 4 Precise Control

---

The sleek touch-control panel responds to the touch of your finger. Halogen lights provide superb illumination over the entire cooking surface. The dimmable light feature enables you to create the perfect level of light. (HC12DCXB1, HC90DCXB1 only).

## WE CONTROL THE WEATHER

At the heart of Fisher & Paykel's Fridge-Freezers is the ability to sense and respond to daily use in an intelligent way. The combination of temperature sensors with smart electronics and variable-speed fans creates a controlled environment and optimum temperature for better food care. We call it ActiveSmart™ technology. Your fridge door is the most used door in your home and, every time it is opened, the temperature changes around your food. The challenge is maintaining a consistent and controlled environment despite ongoing changes inside and outside the fridge. ActiveSmart™ achieves this through constantly monitoring how you and your family use your fridge, adjusting airflow to maintain a stable and even temperature. So despite highs, lows and occasional gusty winds, when it comes to your fridge, let ActiveSmart™ control the weather to deliver better food care.

ACTIVESMART™  
TECHNOLOGY

---

### 90cm CoolDrawer™

---

The CoolDrawer™ has been designed to change from refrigerator to freezer at the touch of a button. It is built on the concept of distributed refrigeration, combining ActiveSmart™ technology with a drawer-based design that can be placed anywhere in the kitchen, home or entertainment area. The CoolDrawer™ provides five temperature settings to deliver total flexibility – freezer, chill, fridge, pantry and wine modes, merging intelligence with convenience.

---

#### 1 Innovative

---

The multi-temperature CoolDrawer™ is a world-first in refrigeration technology.

---

#### 2 Convenient

---

Five temperature settings can be tailored to the needs of your food: freezer, chill, fridge, pantry and wine mode, combining intelligence with convenience.

---

#### 3 Ergonomic

---

There is easy access at waist height, with smooth-running drawers.

---

#### 4 Intuitive

---

The easy-to-use electronic interface can change the CoolDrawer™ temperature at the touch of a button.

---

#### 5 Flexible

---

This innovation complements your existing refrigeration and enhances your kitchen design to suit your lifestyle.

---

#### 6 Precise

---

Highly engineered finishing ensures a 4mm clearance between front panels, as demanded by professional cabinetmakers.

---

---

## CoolDrawer™ Range Features

---

---

### 1 Freezer Mode

---

This mode is ideal for general frozen food storage with the added flexibility of three freezer functions—bottle chill, fast freeze and deep freeze. Freezer Mode is set at  $-18^{\circ}\text{C}$  for longer-term storage of frozen items.

---

### 2 Chill Mode

---

Chill Mode sets the compartment to a temperature perfect for highly perishable meats, poultry and seafood. For these types of food it is ideal to store them at a temperature as close to freezing as possible to retain their vital freshness. Chill Mode sets the compartment at  $-0.5^{\circ}\text{C}$ , just above the freezing temperature for meat.

---

### 3 Fridge Mode

---

This mode provides the ideal storage for most foods requiring normal refrigeration, such as fruit and vegetables, dairy products, processed meats and drinks. The compact upper storage tray is a perfect place for sensitive foods such as peaches, cherries, cheeses and deli items; the tall bin is ideal for large bottles and containers.

---

### 4 Pantry Mode

---

This is designed for foods that require a cool, dark place for storage, such as tropical fruits, tomatoes, bananas, bread and cereals. Pantry Mode provides a solution for all those foods that you didn't previously know what to do with and have always resorted to storing on the bench or in the cupboard. This setting offers a stable storage environment at  $12^{\circ}\text{C}$ , making it ideal for sensitive foods.

---

### 5 Wine Mode

---

Using the innovative Wine Mode, connoisseurs can take advantage of special settings that preserve and present wine at its optimum temperature. This mode is ideal for long-term storage of all wine at  $12^{\circ}\text{C}$  and offers two temperature selections for short-term storage.

---

## French Door Refrigerators

---

This range has been designed to maximise space as well as access. French Door refrigerators bring theatre into the kitchen with unobstructed access to wide-open shelf spaces. Below, a spacious full-extension drawer and storage bins provide ergonomic solutions for freezer items.

---

### 1 Ice & Water

---

Ice & Water models deliver chilled, filtered water automatically. The slimline touch pad and angled water delivery mean that almost any size or shape of vessel can be filled. The icemaker automatically delivers ice into a dedicated bin and can be easily customised to store different volumes.

---

### 2 Humidity Control System

---

The Humidity Control System, together with the cool and consistent temperature delivered by ActiveSmart™ technology, creates the perfect microclimate in each produce bin. Two humidity control slides offer settings for both fruit and vegetables to retain optimal moisture and freshness.

---

### 3 Ergonomic

---

Uninterrupted wide-open spaces and numerous shelving options enable easy customisation for different uses. Quality extension runners allow you to slide out storage bins and trays fully for easy loading and unloading. The storage bins are removable, making food preparation and cleaning easier.

---

### 4 Efficient

---

Alarms on the refrigerator and freezer alert you if the door has been left open. Adaptive defrost means that there is no need for 'holiday mode' settings. The ActiveSmart™ will select the best time to defrost based on how the appliance is being used. When you are away, it will recognise lower levels of use and defrost less often, therefore using less energy.

---

### 5 Safe

---

Secure glass shelving contains drips and spills and prevents them from falling on items stored below.

---

Available in August 2013

---

## Bottom Freezer Refrigerators

---

The 790mm Door Drawer has been designed for what you use most often. The refrigerator enables easy access to everyday items. It includes ergonomic storage bins and glass shelves that can be configured to suit every lifestyle. The lower drawer-based freezer shelves ensure that long-term storage items are just as easy to access. Available as a standard door and drawer format.

---

### 1 Ice & Water

Ice & Water models deliver chilled, filtered water automatically. The slimline touch pad and angled water delivery mean that almost any size or shape of vessel can be filled. The icemaker automatically delivers ice into a dedicated bin and can be easily customised to store different volumes.

---

### 2 Humidity Control System

Fruit and vegetable quality can be maintained at the right humidity and temperature level. The Humidity Control System, together with the cool and consistent temperature delivered by ActiveSmart™ technology, creates the perfect microclimate in each produce bin. Two humidity control slides offer settings for both fruit and vegetables to retain optimal moisture and freshness.

---

### 3 Ergonomic

Uninterrupted wide-open spaces and numerous shelving options enable easy customisation for different uses. Quality extension runners allow you to slide out storage bins and trays fully for easy loading and unloading. The storage bins are removable, making food preparation and cleaning easier. Some models also feature a drawer freezer for ease of use.

---

### 4 Efficient

Alarms on the refrigerator and freezer alert you if the door has been left open. Adaptive defrost means that there is no need for 'holiday mode' settings. The microprocessor will select the best time to defrost based on how the appliance is being used. When you are away, it will recognise lower levels of use and defrost less often, therefore using less energy.

---

### 5 Safe

Secure glass shelving contains drips and spills and prevents them from falling on items stored below.

---

Available in August 2013

### **SURROUND KIT**

The refrigeration Surround Kit helps create a seamless connection between your appliance and its surrounding cabinetry. Available in a stainless steel finish, the kit frames and complements the product. A Joiner Kit can also be used to join two refrigerators. For more information visit [fisherpaykel.asia](http://fisherpaykel.asia) or [fisherpaykel.in](http://fisherpaykel.in)

---

## ActiveSmart™ Range Features

---

---

### 1 Humidity Control System

---

The Humidity Control System, together with the cool and consistent temperature delivered by ActiveSmart™ technology, creates the perfect microclimate in each produce bin. The humidity control lid protects fresh produce from drier refrigerator air, keeping fruit and vegetables fresher for longer. The lid traps the excess water vapour produced and channels it away for evaporation. Two humidity control slides offer settings for both fruit and vegetables, ensuring optimal moisture and freshness is retained.

---

### 2 Variable-speed Fans

---

Independent variable-speed fans control airflow through multiple air ducts in the refrigerator and freezer. This means greater control when new items are introduced to either compartment as well as rapid chill and freezing to ensure food safety and maintain food quality.

---

### 3 Temperature and Door Sensors

---

Sensors constantly record changes to fridge and freezer compartments, including when the doors are opened and when new items are introduced. This information is continuously communicated to the microprocessor which, in conjunction with the variable-speed fans and air ducts, ensures that the temperature in each compartment is kept constant. All ActiveSmart™ fridges can be placed into Sabbath mode.

---

### 4 Adaptive Defrost

---

Alarms on the refrigerator and freezer alert you if the door has been left open. Adaptive defrost means that there is no need for 'holiday mode' settings. The microprocessor will select the best time to defrost based on how the appliance is being used. When you are away, it will recognise lower levels of use and defrost less often, therefore using less energy.

---

### 5 Filtered Ice & Water

---

Unique Ice & Water models have fully integrated in-door water dispensing and internal icemaking that do not use any space in your refrigerator, providing maximum food storage. The slimline touch pad and angled water delivery means almost any size or shape of vessel can be filled with chilled, filtered water. The internal icemaker is housed above the freezer and can fill various-sized bins for customised ice storage.

---

### 6 Ergonomic Design

---

Uninterrupted wide-open spaces and numerous shelving options enable easy customisation for different uses. Secure glass shelving contains drips and spills and prevents them from falling on items stored below. Quality extension runners allow you to slide out storage bins and trays fully for easy loading and unloading. The storage bins are removable, making food preparation and cleaning easier.

CLEEANN

## WE LIVE OUT OF DRAWERS

Fisher & Paykel DishDrawer™ dishwashers are designed to make doing the dishes easier than ever before. The combination of a drawer-based system with smart electronics and independent wash technology delivers unparalleled cleaning and better ergonomics. We call it DishDrawer™ technology. Each of our DishDrawer™ products is a self-contained dishwasher with technology that allows traditional double-format or separate modules to be configured at an ergonomic height, allowing complete design freedom. Wide, tall, double and single-drawer options allow you to choose the combination that works best for your lifestyle. The dishwashers in this range can be concealed easily behind kitchen cabinetry to seamlessly blend in with your kitchen and the ergonomic design minimises bending by requiring less movement to open, load and close.

DISHDRAWER  
TECHNOLOGY

Fluorocarbon Free

---

## DishDrawer™ Wide

---

Designed for the whole family, the DishDrawer™ Wide dishwasher complements the Fisher & Paykel 900mm product range to deliver a total kitchen solution. Providing space for nine place settings, the DishDrawer™ Wide is suited to medium-sized households and can be partnered with additional drawers to cater for larger families.

---

### 1 Innovative

---

Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

---

### 2 Convenient

---

This model is taller than the standard DishDrawer™ dishwasher, so you can fit large plates up to 315mm in diameter. Racking is designed to hold long utensils and can fold away to free up space.

---

### 3 Ergonomic

---

The DishDrawer™ is as easy to open and close as a kitchen drawer and conveniently positioned at bench height so loading and unloading requires minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

---

### 4 Efficient

---

This model has the choice of nine wash programs, including Eco options to minimise water and energy usage.

---

### 5 Safe

---

For added safety, a key lock and child lock are included.

---

### 6 Eco-friendly

---

Uses only 9.4 litres of water on a Normal Eco wash program.

---

---

## DishDrawer™ Tall

---

This model is designed for extra headroom. The increased drawer height fits 330mm plates, making cleaning up after dinner parties a breeze. The DishDrawer™ Tall dishwasher can also easily accommodate oversized platters and extra-long stemmed glasses.

---

### 1 Innovative

Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

---

### 2 Convenient

This model is taller than the standard DishDrawer™ dishwasher, so you can fit in large plates up to 330mm in diameter. Racking is designed to hold long utensils and can fold away to free up space.

---

### 3 Ergonomic

The DishDrawer™ is as easy to open and close as a kitchen drawer and conveniently positioned at bench height so loading and unloading requires minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

---

### 4 Efficient

This model has the choice of nine wash programs, including Eco options to minimise water and energy usage.

---

### 5 Safe

For added safety, a key lock and child lock are included.

---

### 6 Ecofriendly

Uses only 6.7 litres of water on a Normal Eco wash program.

---

---

### DishDrawer™ Double

---

Designed to fit existing kitchen cabinetry, the DishDrawer™ Double dishwasher has comparable dimensions to those of traditional dishwashers but provides the benefit of two independent drawers for added convenience and ergonomics.

---

#### 1 Innovative

---

This dishwasher is a world's first in terms of design and configuration. Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

---

#### 2 Convenient

---

The DishDrawer™ Double dishwasher lets the user match the wash program to the exact load type in each drawer.

---

#### 3 Ergonomic

---

The DishDrawer™ is as easy to open and close as a kitchen drawer and conveniently positioned at bench height so loading and unloading requires minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

---

#### 4 Efficient

---

This model offers the choice of nine wash programs, including Eco options to minimise water and energy usage.

---

#### 5 Safe

---

For added safety, a key lock and child lock are included.

---

#### 6 Eco-friendly

---

Uses only 6.7 litres of water per drawer on a Normal Eco wash program.

---

#### **INTEGRATED MODELS**

The integrated product solution enables seamless fitting between Fisher & Paykel products and your kitchen cabinetry. Your chosen aesthetic can extend beyond storage spaces to enable DishDrawer™ and CoolDrawer™ to blend in with your kitchen environment.

---

## DishDrawer™ Range Features

---

---

### 1 Independent Drawers

---

An independent drawer-based dishwashing platform is part of what makes the DishDrawer™ dishwasher unique. At bench height, drawers glide open for easy access, visibility and better ergonomics. In DishDrawer™ Double dishwashers, both drawers operate independently so different wash cycles can operate simultaneously to accommodate a variety of loads. Glasses, pots and pans can be washed in separate drawers at the same time.

---

### 2 SmartDrive™ Wash Mechanism

---

The unique brushless DC motor acts as both a wash pump and a drain pump, which means fewer moving parts and greater reliability. The pump brings water into the spray arm, which rotates at different speeds depending on the wash cycle selected, to deliver a superior clean and better dish care. In the DishDrawer™ Wide dishwasher, two independent spray arms force water throughout the tub, ensuring maximum efficiency and ultimate wash performance.

---

### 3 Nine Wash Options

---

All DishDrawer™ dishwashers feature nine wash programs: Rinse, Fast Eco, Fast, Delicate Eco, Delicate, Normal Eco, Normal, Heavy Eco, Heavy. The range of settings enables the DishDrawer™ dishwasher to wash everything from fine glass and crystal to heavily soiled pots and pans at the touch of a button. Primary and secondary controls provide a simple interface for program selection and operation, while the 'delay' start setting means the dishes can be done when it's most convenient.

---

### 4 Flow-through Detergent Dispenser

---

The DishDrawer™ dishwasher detergent dispenser ensures that undissolved detergent does not enter into the tub; instead, it is mixed as the machine fills with water. This not only cleans each load better but also reduces the possibility of damaging delicate items such as aluminium, cutlery or porcelain glazes.

---

### 5 Superior Filtration

---

One of the challenges in all dishwashers is a robust filter system that removes debris and avoids blocking. Together, the kidney filter and overmoulded filter plate create a firm seal to ensure that debris does not enter the wash mechanism and cause backflow. It is designed to be removable for easy and hygienic cleaning.

---

### 6 Adjustable Racking System

---

The DishDrawer™ dishwasher includes a range of flexible racking options. The cutlery basket can be customised for different utensils. Folding tines can be folded flat to accommodate a full load of pots or be folded upwards to hold glassware. Pitch-adjustable racks can accommodate normal plates, deep bowls or even slide completely out of the way. Wine glass holders ensure that short and long stemmed glasses are secure throughout the wash. Added retainer clips are ideal for holding chopping boards in position.

---

### 7 Safety Features

---

The DishDrawer™ dishwasher incorporates unique safety features such as a child lock which both locks the drawer to prevent opening and disables the buttons. In addition, it includes three-stage flood protection: the high-strength hose withstands water pressure several times greater than normal, overflow detection cuts the water supply if limits are exceeded and the back-up switch activates the drain pump to remove any excess water.

WAS SH

## WASHING REINVENTED

It takes a lot of brainpower to make things really simple. That, in a sentence, is the essence of SmartDrive™. Traditional washing machines are made up of many moving parts. Their complexity also means there's a lot that can go wrong with them. Fisher & Paykel SmartDrive™ machines are made of just three main parts: a small computer, a flexible agitator and a simple direct-drive motor. This means these washing machines can sense each load, use less water and be ultimately more reliable as they run with less moving parts.

POWERED BY  
SMARTDRIVE

---

## FabricSmart™

---

The FabricSmart™ washing machine is so intelligent it's almost human. It's the only washing machine in the world with true Fabric Sensing technology. Whether it is your favourite shirt or your most loved toy, this machine will deliver the ultimate clothes care.

---

### 1 Innovative

---

SmartDrive™ technology uses a direct drive motor, controlled by a microprocessor, to make an efficient washer. It can accelerate to a maximum spin speed of 1000rpm, removing more water and reducing drying times.

---

### 2 Intuitive

---

FabricSmart™ uses SmartDrive™ technology and flexible agitator fins to sense the average fabric mix of the wash load and designs a wash cycle for it. Fabric Sensing technology means the water level, wash action, wash time and rinse type are always optimised.

---

### 3 Convenient

---

An easy to use LCD screen lets you choose from 13 pre-programmed wash cycles, including Nappy Rinse, Duvet/Doona, Allergy, Sweaty, Muddy, Sport Shoes, Beach Gear, Chocolate, Tomato, Blood/Grass, Fruit/Wine, Bowl Clean, and Max Wash. The self-cleaning lint removal system hygienically disposes of lint automatically.

---

### 4 Ecofriendly

---

The FabricSmart™ has a unique Eco-Active™ Wash that uses a small amount of sudsy water and re-circulates it through the clothes, optimising detergent and energy use. By selecting one of the Save Water options you can save up to 35% more water than traditional top loaders.

---

### 5 Ergonomic

---

The ergonomic design of our top-loading format reduces excessive bending or crouching.

---

---

## WashSmart™

---

The WashSmart™ washing machine is designed for those who like fingertip control, without getting their hands dirty. With five wash cycles, including three new cycles specifically designed to suit the diverse needs of family life and three options: Eco, Soak and Quick Wash. Automatic temperature sensing and automatic water level sensing enables a more effective wash.

---

### 1 Innovative

---

SmartDrive™ technology uses a direct drive motor, controlled by a microprocessor, to make an efficient washer. It can accelerate to a maximum spin speed of 1000rpm, removing more water and reducing drying times.

---

### 2 Convenient

---

WashSmart™ uses SmartDrive™ technology with a flexible finned agitator for ultimate load sensing and clothes care. It has five wash cycles to choose from including Allergy, Handwash and Easy Iron, and three wash Options: Eco, Soak and Quick Wash. The Allergy cycle has been designed along Asthma and Allergy Foundation of American guidelines and removes dust mite waste and detergent residue. The Handwash cycle is designed for delicate items. The Easy Iron cycle is designed to minimise the need for ironing. Hang garments on a coat hanger to dry and some will require a light touch-up, or no ironing at all. The self-cleaning lint removal system hygienically disposes of lint automatically.

---

### 3 Precise

---

The automatic temperature sensing uses an in-built thermometer to precisely mix water to the required temperature. This saves power by making washing in cooler temperatures possible throughout the year.

---

### 4 Ergonomic

---

The ergonomic design of our top-loading format reduces excessive bending or crouching.

---

---

## SmartDrive™ Top Loader Range Features

---

---

### 1 SmartDrive™ Technology

---

To deliver the best clothes care, reduced energy and water consumption and greater reliability, Fisher & Paykel washing machines are powered by SmartDrive™ technology. SmartDrive™ comprises just three main parts: a small computer, a flexible agitator, and a simple direct-drive motor that allow these washing machines to sense each load, use less water and run with less moving parts.

---

### 2 1000rpm Spin

---

All SmartDrive™ washers spin to a speed of 1000rpm. They remove up to 2½ litres more water per load than other washing machines, reducing drying time and drying costs.

---

### 3 Self-Cleaning Lint Disposal

---

All SmartDrive™ washers have a self-cleaning lint disposal system. The water and lint are drawn down the agitator and through the inner and outer bowls. The holes in the stainless bowl trap the lint, which is flushed down the drain. This is a hygienic way of dealing with lint. There is no need for you to touch the lint and no contamination of micro-organisms growing in filters.

---

### 4 Auto Water Level Sensing

---

SmartDrive™ technology is used to determine the right amount of water for each load. People often over-estimate the amount of water required for each load. Washing is a chemical reaction, so too much water means a diluted detergent solution, and less soil removal.

---

### 5 Automatic Temperature Sensing

---

The SmartDrive™ control system uses an in-built thermometer to precisely mix water to the required temperature. This saves power by making washing in cooler temperatures possible throughout the year. It ensures you get better performance.

#### **FRONT LOADERS NOW POWERED BY SMARTDRIVE™**

World-first SmartDrive™ technology is re-engineered for Fisher & Paykel's Front Loader range. By combining smart electronics with vector control and a direct drive motor, the need for a belt and pulley is removed and the motor constantly provides feedback to the computer controlling the tumble and spin action. With 20 years of experience using this technology in Top Loaders, the result is a quieter, quicker and more reliable product.

---

### WashSmart™

---

WashSmart™ provides 13 specific wash cycles and hands-on control to select exactly how you want to wash each load. It is designed for those who like fingertip control, without getting their hands dirty. WashSmart™ has all the clothes care benefits of a front loader, but with SmartDrive™ technology to give a quicker, quieter wash.

---

#### 1 Innovative

---

The Vortex wash speeds up the cleaning process so nine of the 13 cycles take less than an hour to complete when washing at 30°C. It quite simply uses the force of the spinning drum to thrust the detergent solution through the clothes. The Vortex wash means the Everyday cycle can be used for all load sizes.

---

#### 2 Convenient

---

The 'add a garment' option allows you to quickly add or remove a garment mid cycle. A 'wrinkle free' option ensures your wet clothes don't sit around too long at the completion of the cycle and a choice of three soil levels gives you more control over your wash.

---

#### 3 Efficient

---

A maximum spin speed of 1400rpm removes more water from each load, reducing drying times while keeping clothes soft.

---

#### 4 Ecofriendly

---

WashSmart™ delivers both energy and water savings making it one of the most efficient front loaders on the market.

---

Available in July 2013

---

**QuickSmart™**

---

QuickSmart™ offers one touch control with nine programmed cycles. It is designed for you to select and walk away leaving this SmartDrive™ front loader to get on with the job on its own—taking time out of washing so you can spend more time living.

---

**1 Innovative**

---

Using the Vortex wash to speed up the cleaning process, seven of the nine cycles take less than an hour to complete when washing at 30°C.

---

**2 Convenient**

---

Fisher & Paykel's SmartDrive™ contains no belts or pulleys, for a more reliable washer with less vibration and whisper quiet noise levels.

---

**3 Efficient**

---

A maximum spin speed of 1100rpm removes more water from each load, reducing drying times while keeping clothes soft.

---

**4 Ecofriendly**

---

QuickSmart™ delivers both energy and water savings.

---

Available in July 2013

---

## SmartDrive™ Front Loader Range Features

---

---

### 1 SmartDrive™ Technology

---

Fisher & Paykel SmartDrive™ washing machines use our world first direct drive technology, which has revolutionised clothes washing and clothes care since the 1990s. By combining smart electronics with vector control and a direct drive motor, removing the belt and pulleys, these washing machines can sense and respond to each load, delivering exceptional clothes care quickly and quietly.

---

### 2 Quick Vortex Wash Cycles

---

Fisher & Paykel have developed the Vortex wash which speeds up the cleaning process so most cycles take less than an hour to complete. This is like an explosion in the midst of the tumble action which thrusts the sudsy water from the bottom of the drum into and through the clothes. By getting the cleaning agents and heat into the fibres of the clothes quicker the clothes get clean quicker.

---

### 3 Whisper Quiet

---

Our SmartDrive™ Front Loaders use our latest generation direct drive motors, removing cumbersome parts and improving our ability to sense what's happening inside the drum. Without these old components, SmartDrive™ Front Loaders are more reliable, produce less vibration and noise levels are reduced to being whisper quiet.

---

### 4 SmartTouch™ Control Dial

---

The SmartTouch™ Control Dial is your interface to SmartDrive™ technology. It distils 21 years of SmartDrive™ development into a user-friendly interface, to deliver an expert wash every time.

---

### 5 Energy and Water Efficiency

---

Our SmartDrive™ Front Loaders are one of the most efficient front loaders on the market.

---

### 6 Hot and Cold Fill

---

Unlike many others, our SmartDrive™ Front Loaders let you choose whether your water is heated in the washing machine or from your hot water cylinder. With energy efficient quicker wash cycles, environmental and cost savings in mind, Fisher & Paykel Front Loaders can be installed with just a cold water inlet or both hot and cold water inlets—ideal for those with alternative water heating solutions.

DRY

#### NEW MOVEMENT IN CLOTHES CARE

The unique Quad Fin system in our dryers is designed to change the way clothes circulate within the dryer drum. The problem with most twin fin dryers is that they tumble clothes in a fixed pattern, causing hot spots and damp spots. The Quad Fin design rotates and propels clothes from the front to the back of the drum in a continuous 360 degree movement, creating faster and more even drying throughout the load. The refreshed compact dryer range offers a range of options tailored to different household needs.

---

### **AeroSense™ Clothes Dryer**

---

The unique Quad Fin system is designed to change the way clothes circulate within the dryer drum. The Quad Fin design rotates and propels clothes from the front to the back of the drum in a continuous 360 degree movement, removing hot spots and creating more even drying throughout the load.

---

**1 Innovative**

Auto-sensing automatically senses when the clothes have reached the required level of dryness, saving you money and time.

---

**2 Convenient**

Delay start time by up to nine hours, so clothes are ready when you want.

---

**3 Ergonomic**

The front access lint filter makes access easy. Can be wall mounted to save space and eliminate bending.

---

**4 Intuitive**

Wrinkle Free means clothes are tumbled through cool air periodically, until you are ready to remove them. This minimises wrinkles, and ironing.

---

**5 Precise**

Five dryness settings plus two temperature settings ensure clothes are dried the way you want them.

---

**6 Ecofriendly**

Autosensing ensures clothes are not over-dried, saving energy.

Finish	Stainless steel
Dimensions	H750 x W900 x D10mm

**Oven Light**

Remains lit while the oven is in use, but can also be used independently from the other cooking functions.

**Bake**

Heat is provided from the upper and lower elements. A traditional cooking mode, suitable for single shelf cooking of items like cakes, delicate items like sponges, custard tart and crème brûlée.

**Fan Bake**

The oven fan circulates hot air from upper and lower elements and distributes it around the cavity. Food browns more quickly, great for crisping pastry. Suitable for robust items like cookies, scones and muffins.

**Classic Bake**

Uses the heat from the lower element only. This is a traditional cooking mode which is suitable for recipes that were developed in older ovens. For best results, cook on only one shelf at a time. Perfect for foods that require delicate cooking and have a pastry base, like custard tarts, quiches and cheesecake or anything that does not require direct heat and browning on the top surface.

**Pastry Bake/Fan Forced with Lower Heat**

The lower heating element and fan provide outstanding cooking performance.

**Roast**

A two step programme that has been developed to help you cook delicious roasts effortlessly. This function is a combination of grill and bake, grilling your food for the first 20 minutes it then bakes at the set temperature for the rest of your cooking time. This sears the meat to keep in the juices.

**Grill**

The grill element delivers heat for fast, healthy grilling. Perfect for tender meat cuts, toasting and crisping.

**Fan Grill**

The oven fan circulates hot air from the top element for high speed grilling and produces food with a finish that is similar to a rotisserie. Food is crisp and brown on the outside while the inside remains moist and tender.

**Fan Forced**

A very flexible method of cooking. A concealed element surrounding the fan at the rear of the oven heats air which is then distributed evenly around the cavity. This is the ideal mode for multi-shelf cooking and complete oven meals.

**Defrost**

The oven fan circulates air around the oven, speeding up the defrosting process by up to 30%.

**Warm**

Use this function to keep cooked food hot and to warm plates and serving dishes.

**Warm**

Use this function to keep cooked food hot and to warm plates and serving dishes.

**Pyrolytic Self Clean**

During the self clean cycle, the oven reaches higher temperatures than it does for cooking, breaking down soil and grease deposits which can be wiped away with a damp cloth.

**Rotisserie**

A delicious way to cook meat and poultry. The slowly rotating food is basted continuously in its own juices, making it tender on the inside and well browned and full of flavour on the outside. A two step programme that has been developed to help you cook delicious roasts effortlessly. This function is a combination of grill and bake, grilling your food for the first 20 minutes it then bakes at the set temperature for the rest of your cooking time. This sears the meat to keep in the juices.

**Sabbath mode**

This setting is designed for religious faiths that observe a 'no work' requirement on the Sabbath. It is used in conjunction with the Bake function.

Note: Use all oven functions with the oven door closed.
