FELT AFFAIRS

FASCINATION OF FELT

P³ Architectural Solutions

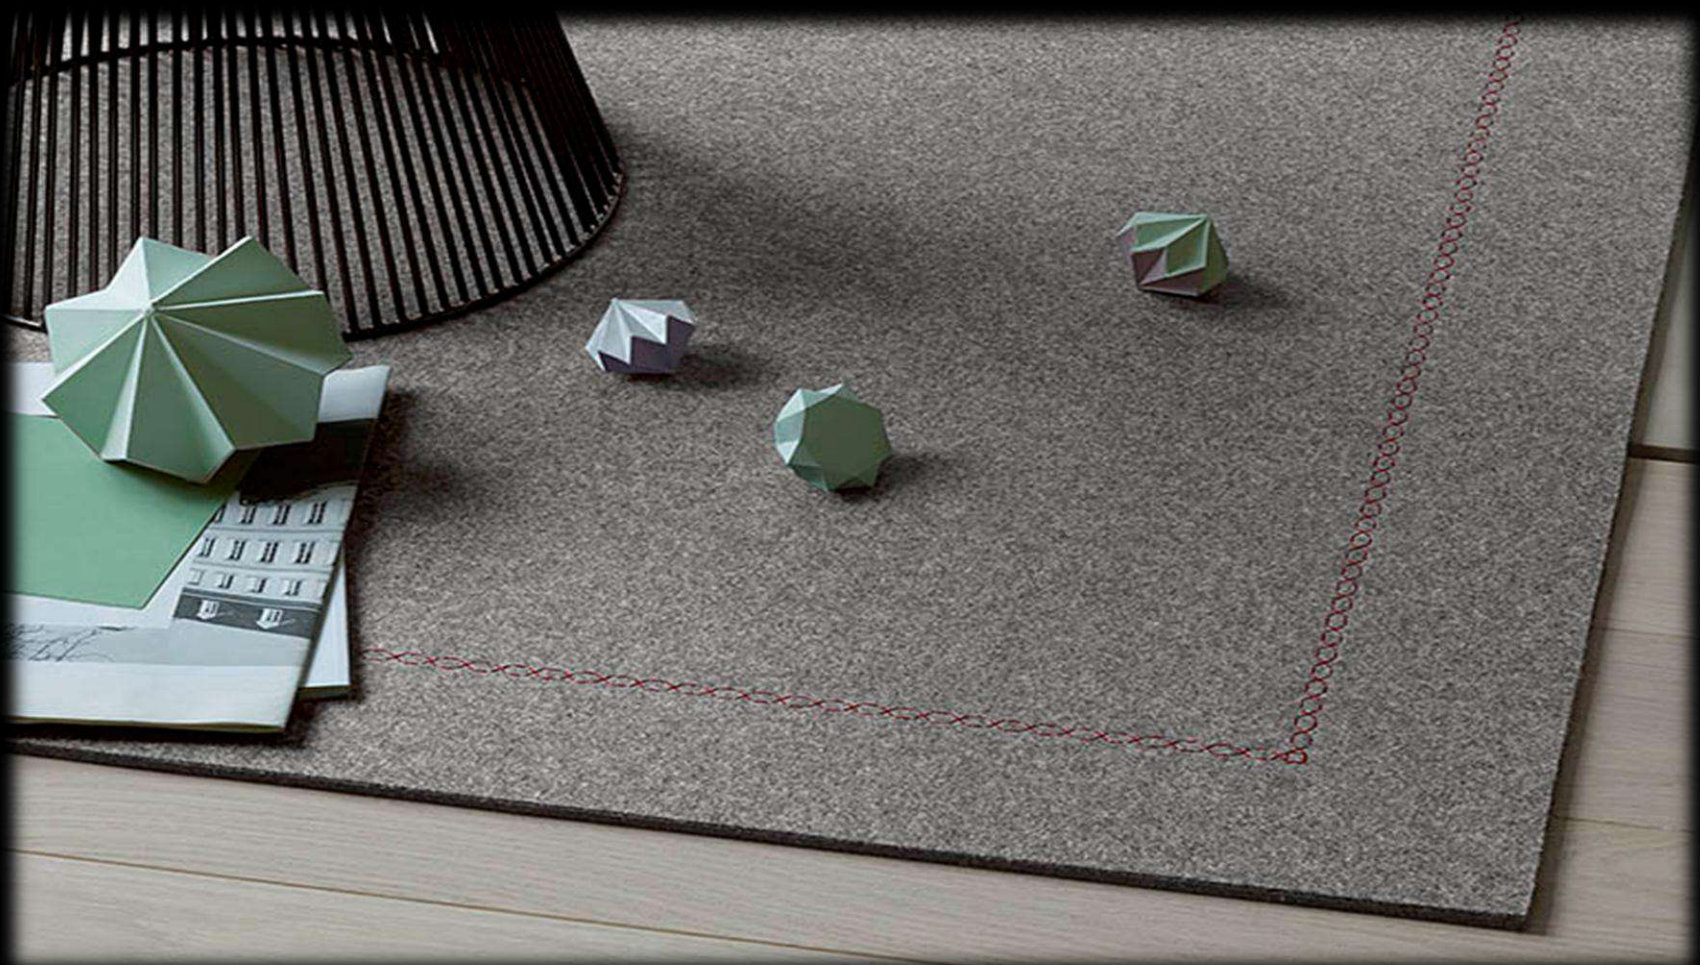

Classic designs and techniques impressively demonstrated by the collection felt affairs experience a most artistic revival. The art of crocheting, for example, is given a new interpretation.. Fringes also receive an attractive update with felt affairs.

Fringes are on-trend again. Yarn from precious, soft merino wool ennobles fringe with a conspicuous edging – a sophisticated combination

The fine decorative stitch creates filigree accents and is the most subtle design in this collection. Sixteen appealing colourways display the design to its best advantage.

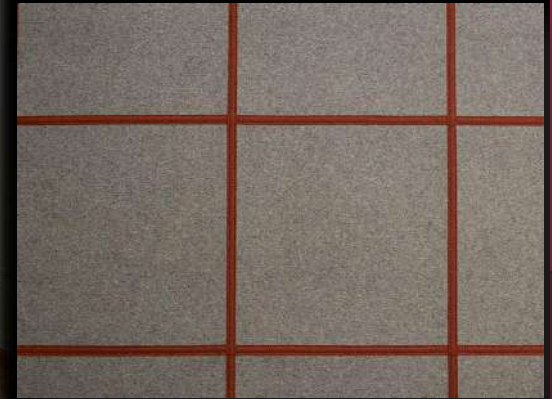

FELT AFFAIRS

MODULAR | CROSS

P³ Architectural Solutions

The module cross comprises individual 30 x 30 cm large felt tiles connected by fine smooth leather, nubuck leather or Kavallerietuch (cavalry cloth). The regular alternation of different structures and materials creates charming contrasts and effective accents.

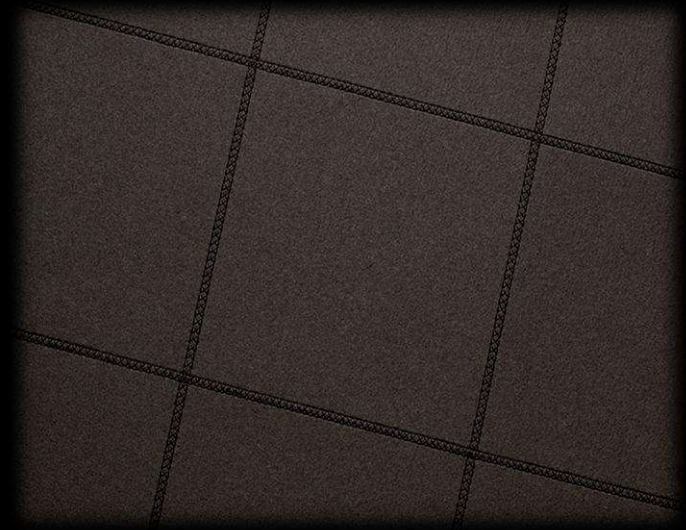

FELT AFFAIRS

MODULAR | CROSS STITCH

P³ Architectural Solutions

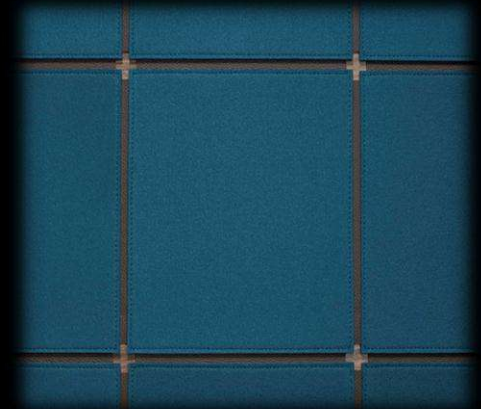

cross stitch – a double backstitch connects all the felt tiles with one another and renders the edges invisible. The seam, in sixteen possible colours, can be employed tone-on-tone or to create a contrast.

FELT AFFAIRS

MODULAR | CONNECT

Materials such as smooth leather, nubuck leather or fine Kavallerietuch (cavalry cloth) are used to lavishly join the felt tiles in the connect system. A particular highlight: the floor remains visible in the middle.

FELT AFFAIRS

FRAME | CORD

P³ Architectural Solutions

Framed by a narrow, elegant piped edging, frame cord embodies pure design. The versatile colour palette of fifteen options determines the style of the carpet and underscores the purist character of the wool felt.

FELT AFFAIRS

FRAME | EDGE

P³ Architectural Solutions

With frame edge the high-class felt is framed by smooth leather, nubuck leather or fine cavalry cloth. The technique enables the seam to be completely hidden. Pure design is the focus of attention.

THE SECRET OF CARPETS OF NATURAL BEAUTY

The carpets of Secrets have a very special source of inspiration: nature. This exclusive collection finds its own way to the heart of the numerous inherent secrets of nature, presenting four exciting designs that effectively capture the archaic power of particularly striking natural phenomena.

SECRETS – STORM

P³ Architectural Solutions

POWERFUL MOVEMENTS

The dynamism and powerful movement of stormy natural spectacles enthrall people time and again. Stormy temperamental winds can be directly experienced and are given a visible expression by the shifting air- pressure lines and almost parallel wind directions of weather maps.

COLOR VARIATIONS :

SECRETS – WOOD

P³ Architectural Solutions

BOLD PATTERNS

The sweeping design of Storm takes up the symbols of weather maps, featuring the changing wind directions and air-pressure movements. The dynamic lines are emphasised by pile sections of different heights that give the phenomenon "storm" a distinctive face.

COLOR VARIATIONS :

SECRETS – LAKE

P³ Architectural Solutions

EXPRESSIVE REFLECTIONS

Lake triggers spontaneous images of the play of light on ruffled water. The generous design visualises the change of light and dark in an amazingly realistic fashion. Thanks to the slightly iridescent effect of the design the viewing of the vivid surface is a fascinating experience to be enjoyed time and again.

COLOR VARIATIONS :

P³ Architectural Solutions

PLAYFUL LIGHTNESS

Air thrills with a wonderfully airy impression. Just like the air that it represents, this purist carpet changes its colour with the changing light. The secret of this fascinating effect lies in the clever combination of matt and brilliant fibres worked in a yarn with different heights.
